***Advanced Project Management Course:***

**Course Description** – This is a comprehensive project management course that exceeds the Project Management Institute, Inc.'s (PMI) educational prerequisites for Project Management Professional (PMP)<sup>®</sup> and Certified Associate In Project Management (CAPM)<sup>®</sup> exam. Prior to attending the five-day formal course, approximately forty hours of Precourse training must be completed by each candidate. This training provides the foundation for the intense forty hours of classroom instruction, which is provided over a period of five days by an experienced PMP<sup>®</sup> instructor. Seventeen modules are covered during classroom instruction which covers PMI's *A Guide to the Project Management Body of Knowledge (PMBOK<sup>®</sup> Guide)* and generally accepted project management practices. Student progress is monitored for both the precourse training and classroom training, and each student is provided counseling as to his/her progress. Instructor assistance is provided for any weak areas in which the student may need to focus. The objective of this course is not only to provide students with the knowledge and skills necessary to pass the appropriate exam, but also to provide the students with working project management knowledge they can take back to their company and use as they conduct their professional responsibilities.

**Course Hours** – Pre-course work (web-based training) is self-paced by the student with weekly student/instructor progress reviews. Classroom instruction is daily from 8:00 AM to 5:00 PM (working lunch).

**Cost of Course** – Visit [www.psipm.com](http://www.psipm.com)
